10. Please explain your rating above about AI's impact on your learning for this submission. (Write in 2-3 sentences) * 

It helped with knowing where I was lacking in, for instance when writing the model view controller I made a couple of mistakes earlier with not correctly write the model part. Ai helped me identify that it was split into three models rather than just one model.

I was somewhat sure because there is no guarantee to be sure that the diagrams are correct even though the details of it maybe be correct. For the mvc it was hand drawn but for the dfd I used lucid to generate that image as trying to do it with app.diagram.net was very difficult. I explained the process in detail as to what each process does so I am somewhat confident that the dfd is correct.

16. Please explain your ratings above, especially if you have AI tools for "other" types of work. *

For coding I put not applicable as this was for the report, and AI helped with refining my ideas and to say if those ideas were right to write in the report. The overall writing of the sections I was required to do was done by me. For the illustrative/sketching I explained in detail as to what it should generate hence why I put mostly ai and some contribution myself, however for the mvc it
